

Composition:

Each film-coated tablet contains Pyridoxine HCL BP 20 mg

Description:

Pyridoxine Hydrochloride is inactive form of vitamin B6. After absorption from the GI tract, Pyridoxine HCl is converted to Pyridoxal Phosphate (biological active form of vitamin B6) which is an essential co-enzyme for a variety of metabolic transmissions in our body.

Indication:

Pyridoxine Hydrochloride is indicated in conditions developed for Vitamin B6 deficiency.

Contraindication:

Pyridoxine HCl is contraindicated in patients with known hypersensitivity to Pyridoxine HCl

Precautions:

Long term administration of large doses of Pyridoxine may develop peripheral neuritis.

Drug interaction:

Pyridoxine HCl may decrease serum concentration of phenobarbital, phenytoin & Levodopa.

Pregnancy and lactation:

Data on exposed pregnancies indicate no adverse effects of pyridoxine in therapeutic doses on pregnancy or the health of the foetus or newborn child, or during lactation.

Dosage And Administration:

One to six tablets daily in divided doses, or as directed by the physicians.

Presentation:

Each box contains 100 tablets of Pyridoxine HCl BP in blister pack.

Storage Condition:

Store it at room temperature. Protect from light. Keep out of reach of children.
